SGQuickLookController

功能：浏览本地文件

继承 QLPreviewController 的自定义控制器

使用方法

    NSString * filePath = @"文件地址";

    NSString * showName = @"展示标题";

    SGQuickLookController * quickLookController = [SGQuickLookController quickLookControllerWithUrl:[NSURL fileURLWithPath:filePath] showName:showName];

    [self presentViewController:quickLookController animated:YES completion:nil];

结语

    初次尝试，请多关照
